# Convenient ways to view statistics

## Get profile reports here

Profile reports give you many statistics with one click

## Get individual health indicator data here

Data viewers show health indicators with trend graphs, quartile maps and data tables

## Query the statistics here

Query systems let you select data using the filters that you want to use

The screenshot shows the FLHealthCHARTS website. At the top, the header includes the Florida Department of Health logo, navigation links (Home, Site Search, CHARTS Tutorials, Feedback), and a search bar. The main banner features the FLHealthCHARTS logo and the subtitle 'Community Health Assessment Resource Tool Set'. The left sidebar contains several menu categories: 'COMMUNITY TOOLS' (County & State Profiles, Behavioral Risk Factor Data, Analytic Ad Hoc Reports), 'HEALTH INDICATORS' (Reportable & Infectious Diseases, Chronic Diseases, Maternal & Child Health, Environmental Health, Injury & Violence, Social & Mental Health, Health Resources Availability, Population Characteristics), 'DATA QUERIES' (Births: Counts | Rates, Deaths: Counts | Rates, Infant Deaths: Counts | Rates, Fetal Deaths, Marriages, Dissolutions of Marriage, Population Estimates), 'ATLASES AND MAPS' (Population Atlas, Birth Atlas, Mortality Atlas), and 'WHAT'S NEW ON CHARTS'. The main content area has a 'Current Features' section with a 'January is Birth Defects Prevention Awareness Month' announcement, a 'COMMUNITY SPOTLIGHT' section with a photo of a group of people, and a 'What's New' section with a URL update. The right sidebar includes 'Florida Health Initiatives' (Healthiest Weight Florida, Healthiest Weight Profiles, State Profile, County Profile, Tobacco Free Florida), 'Most Viewed Indicators' (a list of 10 indicators), 'CHARTS Quick Facts', and 'Did You Know?'. The footer contains navigation links and copyright information.

Community Health Assessment Resource Tool Set

Powered by Florida's Bureau of Vital Statistics

### COMMUNITY TOOLS

- County & State Profiles
- Behavioral Risk Factor Data
- Analytic Ad Hoc Reports

### HEALTH INDICATORS

- Reportable & Infectious Diseases
- Chronic Diseases
- Maternal & Child Health
- Environmental Health
- Injury & Violence
- Social & Mental Health
- Health Resources Availability
- Population Characteristics

### DATA QUERIES

- Births: Counts | Rates
- Deaths: Counts | Rates
- Infant Deaths: Counts | Rates
- Fetal Deaths
- Marriages
- Dissolutions of Marriage
- Population Estimates

### ATLASES AND MAPS

- Population Atlas
- Birth Atlas
- Mortality Atlas

### WHAT'S NEW ON CHARTS

- Bookmark our new URL:  
<http://www.FLHealthCHARTS.com>. Each month, FLHealthCHARTS.com serves more than 24,000 visitors. We provide over 3,500 health indicators, 19 health profile reports and 10 query systems.

### Current Features

#### January is Birth Defects Prevention Awareness Month

Did you know that folic acid promotes good health before, during, and after pregnancy? Starting consumption of the B vitamin folic acid even before pregnancy is crucial. Birth defects of the brain and spine known as neural tube defects (NTDs), such as spina bifida, can occur in the early weeks following conception, often before a woman knows she is pregnant. For more information about how to prevent birth defects, visit the [Florida Birth Defects Registry](#).

©2017, Florida Department of Health

# Data come from many sources

## From AHCA to WIC and lots in between!

More than 25 different programs provide the data that is in CHARTS.

There are nearly 3,000 health indicators!

*CHARTS was developed provide easy access to data for community health planning.*

# Most Data is Updated Annually

CHARTS is updated throughout the year.

A few data sets --like hospitalizations and cancer incidence-- are current even though they are more than one year old.

Query systems show provisional data for the current year.

## We update the data as soon as it is available from each data source.

This means CHARTS is updated throughout the year. By June of the current year, most data will be finalized and updated in FLHealthCHARTS for the prior year.

- **Jan – March:** demographics, poverty level and other census data, WIC, foster children, child abuse, cancer incidence.
- **April – June:** health-related data from agencies and programs
- **July – Sept:** Florida population, vital statistics births, deaths, marriages and divorces

# Homepage Features

## Toolbar

- Search box – enter a search term
- Get tutorials
- Send a question with FEEDBACK

## Navigation

- Profile reports
- BRFSS health behavior data
- Health indicators by topic
- Data queries
- Atlases and maps
- What's New

## Health Observances

- Monthly health observances
- Community stories

## Featured Programs and Facts

- Health initiatives
- Most viewed indicators
- Quick facts, Did You Know?

The screenshot shows the FLHealthCHARTS homepage with several callout boxes identifying key features:

- Navigation:** A box pointing to the left sidebar menu containing categories like Community Tools, Health Indicators, Data Queries, Atlases and Maps, and What's New on Charts.
- Toolbar:** A box pointing to the top navigation bar, which includes a search box, site search, CHARTS Tutorials, and Feedback links.
- Health Observances and Community Stories:** A central box pointing to the 'Current Features' section, which highlights 'January is Birth Defects Prevention Awareness Month' and includes a photo of a group of people.
- Featured Programs and Facts:** A box pointing to the right sidebar, which includes sections for 'Florida Health Initiatives', 'Most Viewed Indicators', 'CHARTS Quick Facts', and 'Did You Know?'.

The homepage itself features a teal header with the Florida Department of Health logo and navigation links. The main content area is divided into several sections, including a large 'Current Features' section with a detailed announcement about Birth Defects Prevention Awareness Month, and a 'What's New on Charts' section at the bottom left.

# Health Indicator Page Features

Click to return  
to Home

- Return to the homepage – click the CHARTS banner or HOME
- A-Z list – see a list of available health indicators for this topic
- Select from a list of topics with the dropdown box
- Get links to related resources

The screenshot shows the FLHealthCHARTS website. At the top, the header includes the Florida Department of Health logo and navigation links: Home, Site Search, CHARTS Tutorials, and Feedback. A search bar is located on the right. The main banner features the FLHealthCHARTS logo and the text 'Community Health Assessment Resource Tool Set' and 'Powered by Florida's Bureau of Vital Statistics'.

On the left side, there is a sidebar with several sections:

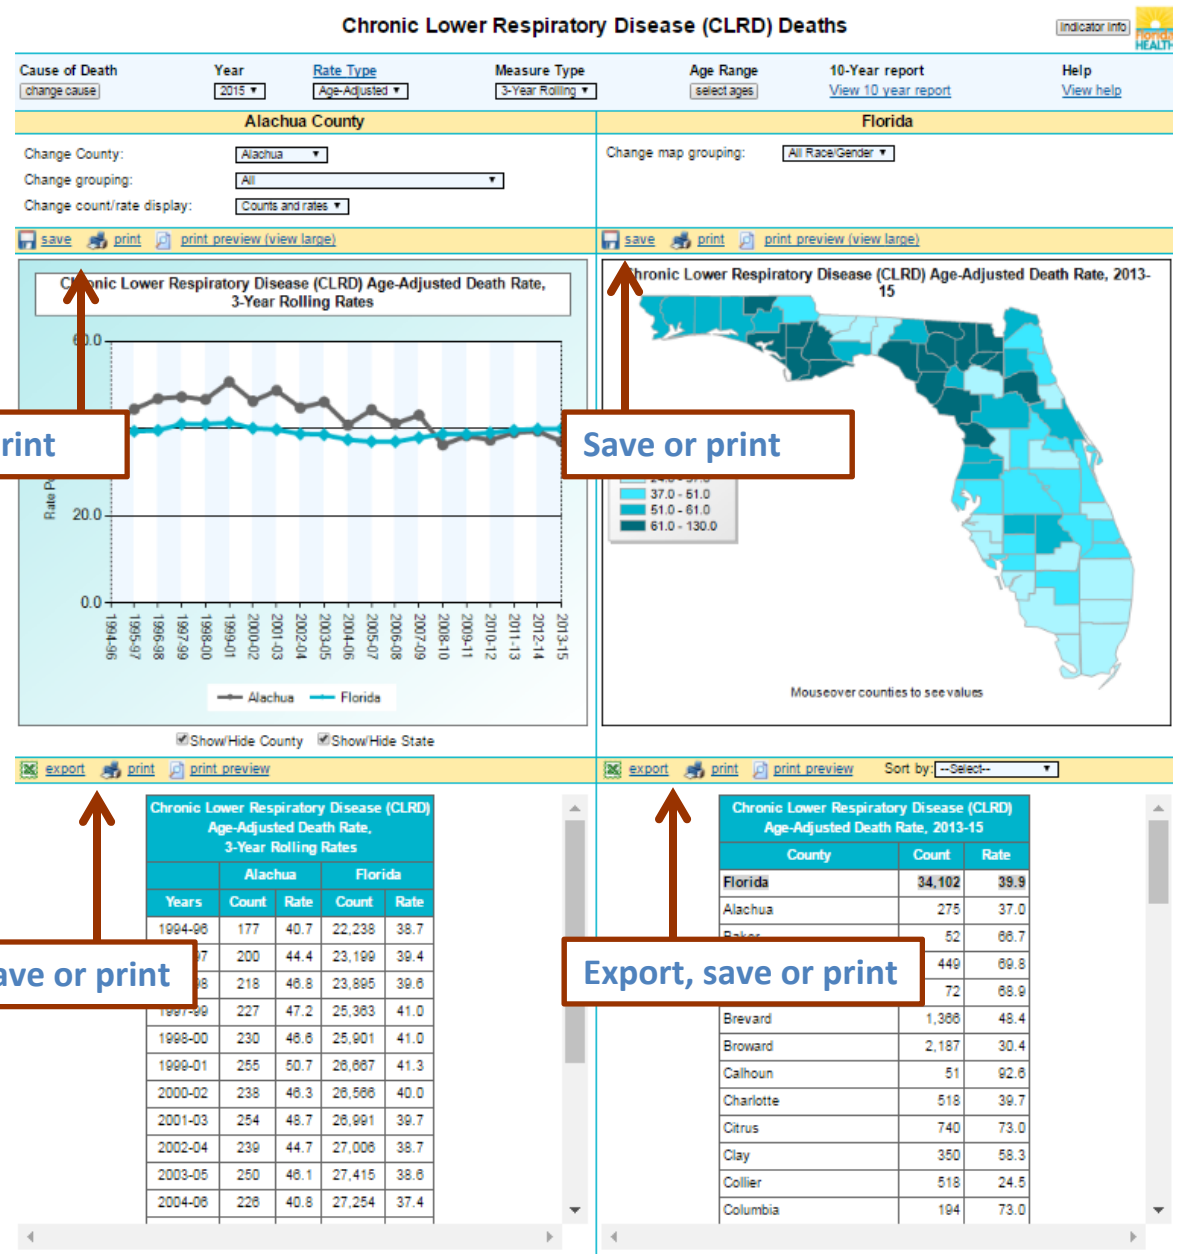

- COMMUNITY TOOLS**: County & State Profiles, Behavioral Risk Factor Data, Analytic Ad Hoc Reports.
- HEALTH INDICATORS**: Reportable & Infectious Diseases, Chronic Diseases, Maternal & Child Health, Environmental Health, Injury & Violence, Social & Mental Health, Health Resources Availability, Population Characteristics.
- DATA QUERIES**: Births: Counts | Rates, Deaths: Counts | Rates, Infant Deaths: Counts | Rates, Fetal Deaths, Marriages, Dissolutions of Marriage, Population Estimates.
- ATLASES AND MAPS**: Population Atlas, Birth Atlas, Mortality Atlas.
- WHATS NEW ON CHARTS**

The main content area is titled 'Reportable and Infectious Diseases'. It includes a link to 'Home » Reportable and Infectious Diseases' and a section 'Find an indicator'. This section contains the text: 'You may find an indicator alphabetically using the [A-Z list](#) or by category'. Below this is a dropdown menu labeled '--Select a Reportable and Infectious Diseases Category--'. An annotation box points to this dropdown with the text: 'See an alphabetical list or select from a list of topics here'.

Below the dropdown is a section titled 'Related resources' which includes links to 'Reportable and Infectious Diseases Frequency Reports', 'Florida Morbidity Statistics Report', 'STD Data from the Bureau of Communicable Diseases', 'Ebola Virus Disease', and 'Influenza'. Each link is followed by a brief description of the resource.

[Reportable and Infectious Diseases Frequency Reports](#)

This website from the Bureau of Epidemiology contains data for all reportable diseases. Data can be grouped by year, gender, age, county and diagnosis status. These reports require Internet Explorer 11.0 using Compatibility View. [Download](#) Internet Explorer 11.0, then select Tools from the menu bar and select Compatibility View from the dropdown list.

[Florida Morbidity Statistics Reports](#)

Data on selected reportable diseases are published at the end of the year in the Florida Annual Morbidity Statistics Report. These reports contain the official statistics, in tabular and graphic form, for the reported occurrence of notifiable infectious diseases in Florida. Unless otherwise noted, the data are final totals for the corresponding year.

# Make Selections

All the selection boxes work similarly.

Choose what you want to see.

1. Check all: check to select all, uncheck to remove all
2. Check one or more counties
3. Click "Done"

## Reportable Disease Frequency Report

The frequency report below is based on [reportable disease information](#) received by the Florida Department of Health as mandated under Section 381.0031, Florida Statutes, and Chapter 64D-3.029, Florida Administrative Code. The report criteria, counts include confirmed and/or probable cases that have occurred in Florida among Florida residents. This report does not include cases of AIDS, HIV infection, sexually transmitted diseases, or other reportable diseases that are not included in the reportable disease information.

## Florida Morbidity Statistics Report

The Florida Morbidity Statistics Report is based on reportable disease information received by county and state health department staff from physicians, hospitals, and laboratories throughout the state obtained through passive and active surveillance. It is a resource to medical and public health authorities at county, state, and national levels. This report is significant because it serves as the final and official record of occurrences of reportable disease and diseases of environmental origin in Florida for the corresponding year. Data summarized in the report are used to identify patterns and trends of disease incidence that are used as the scientific basis for development of disease control and prevention strategies and policy.
